WORK EXPERIENCE

DELOITTE | IT M&A CONSULTANT | Reference: Mathieu Correia <mcorreia@deloitte.fr>

Paris, France | Sept 24 - Jan 25

- **Proactively collaborated** with senior team members & parallel M&A teams (e.g., Finance, Legal, Tax, HR, Ops) throughout **7 IT Due Diligence** projects in various business sectors (e.g., Food, Travel, Insurance, Energy, Sport, Retail, Manufacturing) and deal sizes (Small, Mid, Large)
- **Autonomously led & delivered** a small-size IT Due Diligence project, handling client communications, organizing meetings & workshops with self-chosen agendas, and producing deliverables under a director's review.
- Provided **Tech expertise** on IT Due Diligence projects involving in-house developed solutions and/or non-standard cloud-based architectures.

DELOITTE | INNOVATION TECHNOLOGY DEVELOPER | Reference: Daniel Brunner <dabrunner@deloitte.lu>

Luxembourg | Jun 23 - Aug 23

- **Designed, presented and implemented** state-of-the-art technical solutions for both internal and client-targeted projects.
- **Collaborated** with UI/UX designers while building fully integrated mobile applications in professional-grade ERPs and cloud providers.
- **Conducted research** on Generative AI for potential business opportunities and proof-of-concept demonstrations to company stakeholders.

AGGAEUS | IT CONSULTANT & SOFTWARE ENGINEER | Reference: Haggai Klorman <haggai@aggaeus.com>

Israel & Remote | Dec 21 - Jun 23

- **Drove technical innovation** by proposing, overseeing, and executing new products inside an ecosystem of 100's of websites targeting a wide range of domains (NFT, E-Commerce, B2B, Medical, ...): preen.me / betterweightforlife.com / kardz.biz
- **Provided strategic counsel** to project managers, assessed technical feasibility and delivered accurate development time estimates.
- Engineered **MVP** online stores within compressed timelines (1-2 months) to facilitate rapid public release.

IVAO.AERO | WEB DEVELOPMENT MANAGER | Reference: Jack Plumb <jack.plumb@ivao.aero>

Remote | Jan 21 - Now

- Leading a worldwide team of **10 developers** on a **dozen projects** related to flight simulation, in collaboration with internal and external partners.
- Defining a clear **vision and strategy** to meet functional and technical needs aligned with the network's growth in the next 3 years.
- Designing and maintaining the Web systems' architecture (e.g., K8S, NodeJs, RabbitMQ, MariaDB) to be scalable, modular, and secure.

AMBITION TÉLÉCOM & RÉSEAUX | SOFTWARE ENGINEER

Lyon, France | Aug 21

- **Collaborated** with 5-10 engineers to design an automated order processing tool faster by **75%** and simplify the business **data-flow**
- Implemented **well-known technologies & standards** to create internal tools for specific use-cases
- Developed **algorithms** to read & parse business emails and **automate** repetitive actions that showed an **80% time reduction** in their daily tasks.

FREELANCE | IT CONSULTANT & SOFTWARE ENGINEER

Self-Employed | Mar 20 - Now

- Delivering custom IT solutions to SMEs (100-200 employees), improving operations through tailored software tools and infrastructure improvements.
- Organizing open and consultative discussions with clients to comprehensively understand their **needs** and offer optimal technical solutions.
- **Analyzing** existing infrastructure to **propose improvements** and deploy new tools & applications with minimal changes to their environment.
